

FALL SEALER SALE

10% OFF SEALERS

COUPON

What's protecting your concrete? Just like washing the salt off of your car to protect it from rusting and breaking down, you should wash your concrete and seal it. Sealing your concrete should be done at regular intervals every 2-5 years, or as needed such as if any defects appear on surface or depending which sealer is used at time of placement (some "sealers" are only curing and must be resealed with penetrating sealers within a few months). Sealers will help repel water and salt from penetrating and causing damage. It's that reason why we believe it is so important that we want to give you a 10% off coupon so that you can come in and help protect your investment. Please make sure to call our offices for hours and we will give you informed instructions on how best to apply. **Offer is good through November 12, 2021 and applies from 1 gallon and up. Must bring coupon in with visit!**

This coupon **MUST** be presented at any of our offices. Our suggestion is:

Aquanil – 150-250 Sqft per gallon used on Exterior Concrete RESEAL.

Ultimate X – 150-250 Sqft per gallon used on Exterior Concrete RESEAL.

Super or Regular Diamond Clear – 200-250 Sqft per gallon used on Interior Floors or must use as a curing compound on fresh exterior concrete, especially with driveways that have internal curing or Intraseal. If used as curing compound with Intraseal, **MUST** be RESEALED within several months with Aquanil or Ultimate X.

Silencure SRT – 150-250 Sqft per gallon on new concrete being poured. If using internal curing or sealer, must be applied within minutes of finish broom.

Offer good only through November 12, 2021

Please refer to manufacturers' directions for usage or ask your sales representative about application details.
